

Career Center Services

The Career Center offers a comprehensive career development program beginning in a student's first year of college. Career counseling, resources and employment opportunities are provided to help students choose and prepare for a career and/or graduate/professional study.

Services include:

- Career Counseling
- Graduate School Advising
- On-line Assessment Tools
- Career Resource Library
- Job Search Assistance
- Internships
- RaptorLink
- Job Fairs
- Resume Critique Service
- Interview Training

RUTGERS UNIVERSITY

Camden Campus

What Can I Do With a Major in Chemistry?

The Chemistry Certification Programs and the Traditional Chemistry Program prepare the student for graduate study in chemistry or biochemistry or for employment as a professional chemist or biochemist. The Biochemistry Program prepares the student for graduate study in biochemistry, one of the allied health fields, or for employment in related fields. The Chemistry-Business Program is directed to entry-level preparation for the non-laboratory aspects of the chemical profession and the academic prerequisites for pursuit of the M.B.A. degree.

While many Chemistry graduates work in a related occupation and obtain an advanced degree, others choose another direction. Many careers do not require a specific major but rather a wide range of demonstrated skills and accomplishments. Regardless of your career choices, increase your marketability through internships, responsible work experience, good grades, and involvement in college activities.

What Are RUC Grads Doing With Their Chemistry Degree?

The following is a sample of first jobs of Rutgers-Camden Chemistry majors:

Chemist, US Food & Drug Administration

Plant Manager, Keystone Industries

Research Assistant, Drexel College of Medicine

Teaching Assistant, Rutgers University

Associate Scientist, Colgate Palmolive

Operations Scientist, Merck & Co.

Chemistry Teacher, Teach for America

Lab Technician, Unilever HPC

Many Chemistry majors choose to go directly into the workplace after graduation and others will decide to pursue a graduate degree. Rutgers-Camden Chemistry majors have earned Masters and Doctorate level degrees in all field of Chemistry in addition to degrees outside of Chemistry. This includes the following fields:

Medicine

Allied Health Professions

Biology

Engineering

Forensic Science

Business

Education

Law
