

## RaptorLink: How to Save a Job Search

From **Jobs > RaptorLink Jobs**, click **Advanced Search** to enter job criteria.

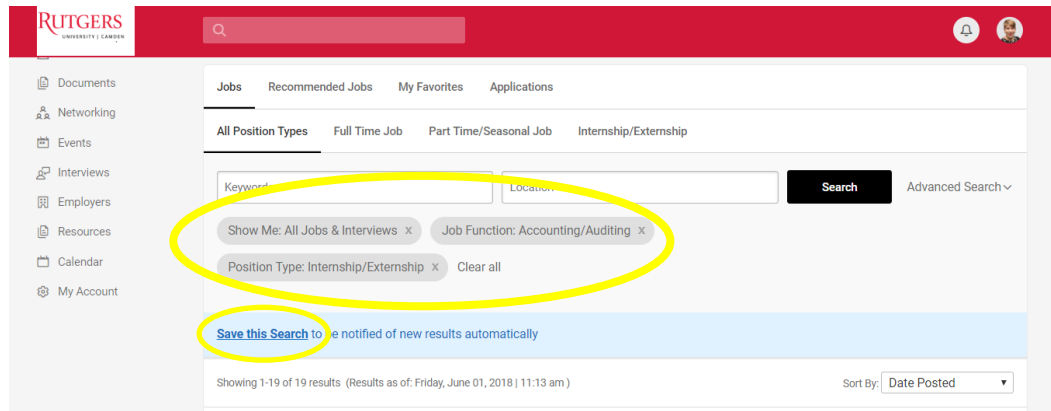

Click **More Filters** at the bottom of the criteria search box to view more search fields, including **Major** and **Degree Level**.

**SEARCH HINT:**  
Employers are not required to select industry, major, or degree level, but they must select **Job Function** and **Position Type**. Choose required fields for the broadest results.

After running your search, you'll be able to see the filters you selected at the top of the list of search results.

Click **Save this Search** to be able to quickly run this search again in the future and/or to receive email notifications about new job postings that match your criteria.

There is no limit to the number of saved searches you can have.

To edit, delete, or run your search, click on **saved searches**.

Click on **Edit** to change frequency or any other criteria.
